-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 19 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) 11-21 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

### **DETAILED ACTION**

1. Claims 1-21 are pending. Claims 1-10 have been considered. Claims 11-21 are withdrawn from consideration.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/19/2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4, 5, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Fischer (US 6141423).

Art Unit: 2137

As per claim 1, Fischer discloses sending a request for network account credentials from an originating account associated with an unpublished object at a dispatch associated with a published object, the request directed to the published object associated with the dispatch includes identification of the unpublished object associated with the originating account (see column 10 lines 14-42); authenticating the originating account at the dispatch (see column 11 lines 4-16); and, upon authenticating the originating account, sending an emblem that includes an object and credential, for a network account to the originating account, the emblem sent to the unpublished object associated with the originating account and having the identification as included with the request (see column 12 lines 12-18 and Figures 4 and 6).

As per claim 4, Fischer discloses that each of the published and unpublished objects are files (see column 10 lines 14-42 and Figures 4 and 6).

As per claim 5, Fischer discloses that the emblem comprises a token (see Figure 4).

As per claim 8, Fischer discloses the network account for which the emblem is sent from the dispatch to the originating account comprises an agent account of an agent (see column 11 lines 4-16 and column 12 lines 12-18).

Art Unit: 2137

**Claim Rejections - 35 USC § 103**

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer.

As per claim 2, Fischer discloses that both the request and emblem are encrypted. However, Official Notice is taken that at the time of the invention it would have been obvious for the request to be unencrypted. Motivation to do so would have been that processing unencrypted requests is faster.

As per claims 3 and 4, Examiner takes official notice that message queues and files are well known in the art. It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize message queues or files in order to store or transport data. It is noted that since Applicant has not traversed the Official Notice the above statements (regarding claims 3 and 4) are taken as admitted prior art (See MPEP 2144.03).

Art Unit: 2137

7. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer as applied to claim 1 above, and further in view of Hoffman et al. (US 5613012).

As per claim 6, Fischer fails to disclose the network account for which the emblem is sent from to dispatch to the originating account comprises a batch account of the dispatch.

However, Hoffman et al. teaches such a batch account (see column 39 line 55 through column 40 line 11).

At the time of the invention it would have been obvious to a person of ordinary skill in the art to include a batch account in the Fischer system.

Motivation to do so would have been to provide a fraud-resistant system that will allow a user to access multiple accounts and procure all services authorized to the user (see Hoffman et al. column 5 line 35 through column 6 line 27).

As per claim 7, the modified Fischer and Hoffman et al. method discloses, sending an emblem for the network account to the originating account comprises remoting a batch account to the originating account, such that the emblem comprises an emblem for the batch account (see Hoffman et al. column 39 line 55 though column 40 line 11).

Art Unit: 2137

8. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer as applied to claim 1 above, and further in view of Ault et al. (US 5974566).

As per claim 9, Fischer fails to disclose proxy logging on to an agent and remoting an agent account to the originating account upon proxy log on to the agent, such that the emblem comprises an emblem for the agent account.

However, Ault et al. teaches such proxy logging on (see column 1 line 51 through column 2 line 20).

At the time of the invention it would have been obvious to a person of ordinary skill in the art to use proxy logging on in the Fischer method.

Motivation to do so would have been to serve repeated login requests more quickly (see Ault et al. column 2 lines 8-20).

9. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischer as applied to claim 1 above, and further in view of Burnett et al. (US 6006018).

As per claim 10, Fischer fails to disclose the emblem expiring and renewing the about to expire emblem.

However, Burnett et al. teaches renewing expired emblems (see column 22 lines 41-46).

Art Unit: 2137

At the time of the invention it would have been obvious to a person of ordinary skill in the art to renew about to expire emblems in the Fischer method.

Motivation to do so would have been to allow the user to be authenticated again (see Burnett et al. column 22 lines 41-46).

### ***Response to Arguments***

10. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
